UX Testing + UI Iteration

	User Interface: *How could the styling of elements be changed to make a more visually appealing, clear, and space efficient layout?* *(ex: sizes, colors, fonts, alignment, etc.)*	**User Experience:** *What elements of the user experience could be improved to make the page more intuitive and more fun/satisfying?* *(ex: sounds, hover effects, press effects, etc.)*
User 1 Name: *Sophie*	• Colors are visually appealing- fit well with the character (margot robbie) • Some of the pictures can be less blurry- the quote picture can be changed to a clearer image • Change "Character, Scene, Quote," buttons on the Barbie side to be white so it matches the original Barbie font • Black font is fine for Harley's side	• Add sound effects for buttons and or quotes, maybe for the character to say the quote • Hover is fine- it enlarges and brightens • Add a click sound effect to the buttons
User 2 Name: *Arianna*	• Spacing for where the "Harley Quinn" text is - change spacing so the image is not cut off • Colors match the theme of characters and scenes • Change the buttons to red so they match Harley better	• Add sound effects to buttons • Buttons are fun; nothing needs to change there • Make the images better quality- for the Harley Quinn side
User 3 Name: *Ashley*	• Make buttons bigger and thicker- it's a little small • Make colors a tad bit brighter, specifically Barbie buttons, to be a more hot pink • Alignment is fine	• Add sound effects somewhere- at least one, maybe button clicking or something to play • Hover effects are fine • It's satisfying- fade feature is nice when u click each button when the middle page picture changes
User 4 Name: *Aidan*	• Some images are stretched out, the Harley Quinn image is cut off • Colors are fine- nothing is confusing - colors are where they're supposed to be • Fonts are fine- they match- just the images need to be aligned better	• Add clips of the scenes rather than the image • Make the images on click play a sound, but it doesn't need it • Hover effects are fine- Barbie buttons are uneven, so for character and scene, make them even

User 5 Name: *Logan*	• Harley Quinn images are blurry- Barbie is clear but Harley is blurry • Harley Quinn's name is cut off at the top. If I can change that so the alignment does not cut the image off •	• Transitions and hover effects are fine • Sounds aren't needed • Don't do the transitions if it's for the same image • Simple but nice transitions

UI Before Feedback (Screenshot / GIF)	*What trends did you identify in your feedback?*
	• Adding sound effects when each button is clicked • Make sure Harley Quinn's text at the top is not cut off • Make Barbie's buttons more visually appealing (background color and text color change) • Make the Harley Quinn button brighter or even change the background color completely • Make Harley Quinn images clearer and not so blurry- mainly the quote image

UI After Feedback (Screenshot / GIF)	*What changes did you make to improve your UI?*

- I resized the Harley Quinn Image so it's not cut off at the top
- I added a new white glow hover affect to the buttons
- I changed the text colors of the buttons to white so it's more visible
- I added sound to when scene and quote button is clicked it plays a click sound
- I added a sound to when you press the character button for each it has a customized sound for Barbie/Harley
- I made a reset button in the middle div so when you click it, it goes back to the original image from the loading screen along with a pointer cursor so the user knows it does an action
- I changed the Harley Quinn images so that they are not blurry and some are higher quality
- I changed the sizing of the buttons so they are all even and don't look bigger than others

She's everything.
He's just Ken.
